

# Is necessity to print nitrogen purged in the pack?

food-safety, shelf-life, quality, food-science, food-technology.

---

**PRABHANKUSH** 1 July 16, 2021, 6:35am

currently we are using the Nitrogen in the Food products while packing for the product freshness, or many reasons.

Does FSSAI says the E No of nitrogen should be printed on the LAbel of product?

Did you check regulations?

---

**PRABHANKUSH** 3 July 17, 2021, 6:30am

yes, but there is no clear information to print or not on the label, regulation says you can use for the product packing.

one more question is necessity to add the saem nitrogen as ingredient too?

I see many products in the market with nitrogen but no-one brand has written NIitrogen as ingredient on the product label or etc.
